

CAWCR Wave Hindcast pre-June 2013 ERRATA

Issued 21/09/2020.

Wave data pre-June 2013 was created with an early release of WAVEWATCHIII (v4.08).

Note that pre-June 2013 variable 't' should not be used.

Pre-June 2013, Variable 't', named *mean wave period using the first spectral moment* is a duplicate of variable 'tm0m1' *mean wave period using the first inverse spectral moment*.

Post-June 2013 (inclusive), Variables 't01' represent *mean wave period using the first spectral moment*, and 't0m1' represents *mean wave period using the first inverse spectral moment* with no issues.

Several other variable names changes took place during the upgrade.
